USAGE

Follow this steps to transfer products from SOURCE Prestashop website to TARGET Prestashop website.

TARGET website

- find the ID number of the appropriate tax rate group

The screenshot shows the Prestashop Back Office interface. At the top, there are navigation tabs for Catalog, Customers, Orders, Payment (highlighted), and Shipping. Below these are sub-tabs for Currencies, Taxes, Tax Rules, and Vouchers. A breadcrumb trail shows Back Office > Payment > Taxes. There is an 'Add new' button with a plus icon. Below that, it says 'Page 1 / 1 | Display 50 / 2 result(s)' with 'Reset' and 'Filter' buttons. A table lists tax rules:

<input type="checkbox"/>	ID	Name	Rate	Enabled	Actions
<input type="checkbox"/>	--			--	--
<input type="checkbox"/>	1	DPH CZ 20%	20.000%	✓	
<input type="checkbox"/>	2	DPH CZ 10%	10.000%	✓	

Below the table is a 'Delete selection' button.

- use ftp to transfer the images from the SOURCE website product image folder (img/p) into a folder of the TARGET website. Do not use img/p at the target website.

SOURCE website

- Install the module
- Save settings, the tax rate and image directory belongs of the TARGET website
- Create the product csv files (usually several numbered product files are created) . Most likely, several different csv product files will be created
- create the remaining csv files (categories, manufacturers etc.)
- Optional: download the csv files and edit them in a spreadsheet editor if required

TARGET website

- Upload all the csv files into the admin/import folder

[Add new](#)

Page 1 / 1 | Display 50 / 2 result(s)

[Reset](#) [Filter](#)

<input type="checkbox"/>	ID	Name	Rate	Enabled	Actions
<input type="checkbox"/>	--			--	--
<input type="checkbox"/>	1	DPH CZ 20%	20.000%	<input checked="" type="checkbox"/>	Edit Delete
<input type="checkbox"/>	2	DPH CZ 10%	10.000%	<input checked="" type="checkbox"/>	Edit Delete

[Delete selection](#)

- Import the csv files in the following order: manufacturers, suppliers, customers, addresses, categories, products
- Skip the first line if used for description. Check "delete existing " if appropriate
- **It is very important to inspect all columns before importing and match them manually if appropriate**

Your data

Please set the value type of each column

Corrected

The screenshot shows a data table with two columns: 'Image URLs (x,y,z)' and 'Product creation c'. The 'Image URLs' column contains several rows of image paths, each starting with '..\upload'. A red arrow points to the 'Image URLs' column header.

Image URLs (x,y,z)	Product creation c
imageurls	features
..\upload	
/p/355-1657.jpg,..\upload	
/p/355-1658.jpg	
..\upload	
/p/354-1655.jpg,..\upload	
/p/354-1656.jpg	
..\upload/p/351-1640.jpg	
..\upload	
/p/350-1638.jpg,..\upload	
/p/350-1639.jpg	
..\upload/p/349-1637.jpg	
..\upload	
/p/348-1635.jpg,..\upload	
/p/348-1636.jpg	
..\upload	

- If the product images are not visible, open the settings / images tab , edit available image types and assign them to products as appropriate
- Regenerate the product miniatures. It is recommended to regenerate one type of image at time
- If the categories are not displayed at the frontend, uninstall and install the categories module
